

# DORNIER ARIES®

ORTHOPEDIC SHOCKWAVE THERAPY  
WITH SMART FOCUS™ TECHNOLOGY

# DORNIER ARIES® — A COMPACT AND ORTHOPEDIC SHOCKWAVE DEVICE

## ESWT - Non-invasive Treatment

Extracorporeal shockwave therapy (ESWT) is a non-invasive, in-office treatment requiring no anesthesia. Shockwaves are delivered from outside of the body to the area of discomfort, triggering the body's own repair mechanisms to initiate natural healing.

## Shockwave Pioneers

Pioneered by Dornier MedTech, extracorporeal shockwave therapy (ESWT) has been used successfully for a variety of orthopedic indications worldwide for over twenty years.

## Electromagnetic Shockwave Emitter

The DORNIER ARIES utilizes a flat electromagnetic shockwave emitter (EMSE) unique to the orthopedic industry. This technology has demonstrated great success in shockwave applications over past decades due to its consistent and repeatable shockwave characteristics.

## Advantage

- Wide power range
- Consistent and repeatable shockwaves
- Long EMSE lifetime
- Intuitive operation via touch screen
- Transportable - Optional transport case or cart

## Smart Focus™ Technology

Smart Focus™ technology allows variable penetration depth at the push of a button. This provides a smooth workflow and flexibility to quickly switch between different energy and depth requirements without the use of gel pads.

## Ergonomic Applicator

The lightweight, ergonomic design of the applicator allows for comfortable handling during treatments. The integrated control buttons of the applicator permit convenient single hand operation when adjusting the energy level and shockwave frequency.

## Spectrum of Orthopedic Indications

- Epicondylopathy of the elbow
- Heel spur and neck pain
- Achillodynia
- Pain conditions in the shoulder (supraspinatus tendon, calcific shoulder tendinitis)
- Patella tendonitis
- Proximal iliotibial band friction syndrome
- Tibial stress syndrome
- Greater Trochanteric Pain Syndrome
- Morton's neuroma
- Fibromyalgia
- Treatment of myofascial trigger points

## **DORNIER ARIES WAS DEVELOPED BY DORNIER MEDTECH**

Dornier MedTech is headquartered in Wessling near Munich, Germany, and is a full subsidiary of Accuron Technologies Limited. Dornier is a medical device company focused on providing leading technology and improving life by delivering scientifically superior products and solutions to physicians, healthcare providers and research groups involved in urological care. As pioneers of Extracorporeal Shockwave Lithotripsy (ESWL) and a variety of surgical lasers, Dornier's 40 years of innovation and service has made it one of the most trusted medtech companies in the industry.
