
FOAM & MICRO-GRANULES TRANSPORT MATTRESS

Réf. 5044

CareWave[®]
by **médipréma**

Support and comfort for newborn babies

By combining both a comfortable **shape recall foam mattress** with **polystyrene micro-granules** acknowledged for their maintaining properties, the mattress *Carewave* by *Médipréma* brings an effective solution to the problems of safety and comfort during transport.

- The shape recall mattress is made of visco-elastic foam which moulds the shape of the child's body. Its **soft comfort** enables to reduce inconvenience caused by jolts during transport.
- The additional micro-granules filling enables to **maintain** the newborn body. Better retained the baby feels more secure and more quiet during transport.

Specially sized to be used in **médipréma** Nite transport incubator, the foam & micro-granules transport mattress, placed **directly on the mattress**, provides ideal comfort conditions to receive the baby.

The foam and micro-granules transport mattress can be attached to the bedding area thanks to the Magic Straps straps. The Magic Straps is a limp micro-fiber velcro strap, soft to the touch, very easy to put in place as well as to take off.

The foam and micro-granules transport mattress is **light** and **easy to put in place**. It can be taken off as easily in order to quickly install the baby on the hard bedding for special medical procedures.

The bi-elastic polyurethane cover is **suited to skin contact**, and is **easy to clean** and disinfect by sponging.
