

TRANSPORT SAFETY SYSTEM

EMBRACE

REF. 5130

For Médipréma Nite transport incubator

To secure baby transport

Comfort and immobilization of the child

Mattress intended to protect babies up to 3.9kg in case of hard braking, fast turns or minor impacts.

This microgranules vacuum mattress can be shaped to match the child's body and can be configured differently depending on the needs and circumstances.

The child remains visible and quickly accessible during transport.

Embrace system includes :

- a painted aluminum base onto which is screwed the vacuum mattress. The system can be installed instead of the bedding provided with the Nite. Embrace can be installed and removed easily to face to all situations.
- An Embrace vacuum mattress (latex free)
- A manual vacuum pump
- A set of disposable accessories : cover with integrated foam mattress for baby comfort, belt, set of belt locks 10 pcs. This disposable set has to be renewed for each patient.
